TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java

Backend: Node.js, Express, FastAPI, REST APIs, WebSockets, Redis, Message Queues, Prisma ORM, SQLAlchemy

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion

Databases: PostgreSQL, MongoDB, NeonDB, Supabase

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, GitHub Actions (CI/CD), Postman

AI & Tooling: LangChain, LangGraph, OpenAI API, Ollama, Puppeteer

EXPERIENCE

ITMTB Technologies Pvt. Ltd. — Full Stack Engineer Intern

Dec 2024 – Jun 2025

- Scaled backend services using Node.js, Express, and PostgreSQL for one of India's top 4 e-commerce platforms, reducing API response times by 28% across 15+ high-traffic endpoints.
- Built secure REST APIs for authentication, product lifecycle management, and order workflows used by 100+ internal stakeholders, improving data reliability by 40%.
- Automated catalog transformation pipelines to clean, categorize, and standardize 10,000+ SKUs, cutting manual data operations by 70%.
- Deployed cron jobs and background workers to sync inventory, analytics, and catalog data across systems, improving cross-system data accuracy significantly.
- Participated in system design discussions on rate limiting, caching, and modular service separation to reduce peak-time server load.

GSSoC – GirlScript Summer of Code — Open Source Contributor

May 2024 – Oct 2024

- Resolved 20+ backend and full-stack issues using Node.js, WebSockets, and Next.js across repositories with 3,000+ active contributors.
- Deployed microservices on Cloudflare Workers and optimized edge compute workflows, reducing global API latencies by ~30% for 10,000+ monthly calls.
- Implemented Redis-backed caching and optimized Prisma ORM queries, reducing redundant database reads by 55%.
- Completed 40+ PR reviews and enforced CI/CD checks, improving long-term code quality and maintainability.

PROJECTS

Pluto — Next.js · TypeScript · Node.js · PostgreSQL · Prisma

- Building a finance intelligence platform for esports creators and gaming orgs — centralizing revenue streams, sponsorships, and tournament earnings in one dashboard.
- Architected component structure and service layer from scratch, establishing folder conventions and API interceptors for long-term maintainability.

Upwork Scraper & Proposal Generator — Node.js · Python · Puppeteer · LangChain · OpenAI

- Built a Puppeteer-based scraper extracting 4,000+ Upwork listings per day with 92% success rate using session reuse and request throttling.
- Created an LLM pipeline to generate tailored job proposals from scraped listings in under 4 seconds, reducing manual effort by ~10x.

EDUCATION

B.E. Computer Engineering

2021 – 2025

V.V.P Engineering College, Rajkot, Gujarat · CGPA: 8.00
